Implementierung und Evaluation eines Langstrecken-Funkkanals für Drohnen

Titel der Arbeit (Übersetzung)

Bachelor-Arbeit

Studiengang: Informatik

KOM-type-number

Eingereicht von Pascal Dornfeld

Tag der Einreichung: 01. Januar 1990

Gutachter: Prof. Dr.-Ing. Ralf Steinmetz

Betreuer:

Technische Universität Darmstadt

Fachbereich Elektrotechnik und Informationstechnik

Fachbereich Informatik (Zweitmitglied)

Fachgebiet Multimedia Kommunikation (KOM)

Prof. Dr.-Ing. Ralf Steinmetz

Erklärung zur Abschlussarbeit gemäß § 23 Abs. 7 APB der TU Darmstadt

Hiermit versichere ich, Pascal Dornfeld, die vorliegende Bachelor-Arbeit ohne Hilfe Dritter und nur mit den angegebenen Quellen und Hilfsmitteln angefertigt zu haben. Alle Stellen, die Quellen entnommen wurden, sind als solche kenntlich gemacht worden. Diese Arbeit hat in gleicher oder ähnlicher Form noch keiner Prüfungsbehörde vorgelegen.

Mir ist bekannt, dass im Falle eines Plagiats (§38 Abs.2 APB) ein Täuschungsversuch vorliegt, der dazu führt, dass die Arbeit mit 5,0 bewertet und damit ein Prüfungsversuch verbraucht wird. Abschlussarbeiten dürfen nur einmal wiederholt werden.

Bei der abgegebenen Bachelor-Arbeit stimmen die schriftliche und die zur Archivierung eingereichte elektronische Fassung überein.

Darmstadt, den 01. Januar 1990

Pascal Dornfeld

Abstract

The abstract goes here...

1 Introduction

Hint:

This chapter should motivate the thesis, provide a clear description of the problem to be solved, and describe the major contributions of this thesis. The chapter should have a length of about two pages!

1.1 Motivation

What is the motivation for doing research in this area?

1.2 Problem Statement and Contribution

What is the problem that should be solved with this thesis?

1.3 Outline

How is the rest of this thesis structured?

2 State of the Art

Hint:

Other approaches to the same problem. The chapter should have a length of about five pages!

BibTeX-Test: [?] ? [?]

2.1 Background Topic 1

2.2 Background Topic 2

2.3 Summary

3 Related Work

Hint:

This chapter should give a comprehensive overview on the related work done by other authors followed by an analysis why the existing related work is not capable of solving the problem described in the introduction. The chapter should have a length of about three to five pages!

3.1 Related Work Area 1

3.2 Related Work Area 2

3.3 Analysis of Related Work

3.4 Summary

4 Design / Concept

Hint:

This chapter should describe the design of the own approach on a conceptional level without mentioning the implementation details. The section should have a length of about five pages.

4.1 Requirements and Assumptions

we need: microcontroller, (wireless) connection to phone, 6-or-more-axis sensor, power converter, battery or something-like-that for evaluation: something to measure power consumption

4.2 System Overview

4.2.1 Component 1

4.2.2 Component 2

4.3 Summary

5 Implementation

Hint:

This chapter should describe the details of the implementation addressing the following questions:

1. What are the design decisions made?
2. What is the environment the approach is developed in?
3. How are components mapped to classes of the source code?
4. How do the components interact with each other?
5. What are limitations of the implementation?

The section should have a length of about five pages.

5.1 Architecture

5.2 Design Decisions

5.3 Interaction of Components

5.4 Summary

6 Evaluation

Hint:

This chapter should describe how the evaluation of the implemented mechanism was done.

1. Which evaluation method is used and why? Simulations, prototype?
2. What is the goal of the evaluation? Comparison? Proof of concept?
3. Which metrics are used for characterizing the performance, costs, fairness, and efficiency of the system?
4. What are the parameter settings used in the evaluation and why? If possible always justify why a certain threshold has been chosen for a particular parameter.
5. What is the outcome of the evaluation?

The section should have a length of about five to ten pages.

6.1 Goal and Methodology

6.2 Evaluation Setup

6.3 Evaluation Results

6.4 Analysis of Results

7 Conclusions

Hint:

This chapter should summarize the thesis and describe the main contributions of the thesis. Subsequently, it should describe possible future work in the context of the thesis. What are limitations of the developed solutions? Which things can be improved? The section should have a length of about three pages.

7.1 Summary

7.2 Contributions

7.3 Future Work

7.4 Final Remarks
